

Supporting your discoveries since 1987

Biospecimens were provided by the NCI funded Cooperative Human Tissue Network (CHTN). Other investigators may have received specimens from the same tissue specimens.

The CHTN is comprised of six academic institutions who collect and distribute remnant human biospecimens from routine surgical and autopsy procedures to investigators for basic and applied science to advance biomedical research.

CHTN Eastern Division: *University of Pennsylvania*

CHTN Mid-Atlantic Division: *University of Virginia*

CHTN Midwestern Division: *The Ohio State University*

CHTN Pediatric Division: *Nationwide Children's Hospital*

CHTN Southern Division: *Duke University*

CHTN Western Division: *Vanderbilt University Medical Center*
